

## Service Technician (Electrical) (m/w/d)

### Your Tasks

- You will be responsible for the final operation adjustment of the onshore wind power generator in your area, maintenance, maintenance, troubleshooting, and product updates of the electrical system. There are many welfare programs, and there is an environment / system that is easy to work;
- Basically, a team of two people is formed, and after moving to the site in a service car, work is carried out. Carry out maintenance inspections while going up and down inside and outside the wind turbine. For the time being after joining the company, we expect that you will gain experience in equipment inspection work, and in a few years you will be responsible for not only inspection but also repair work including electrical work

### Your Skills

- Some knowledge/experience in electricity;
- Second-class electrician or above;
- First-class driver's license Ordinary car (AT acceptable);
- Persons who are not allergic to English.
- Those who want to support Japan's wind power infrastructure are welcome.

## DRIVING THE FUTURE

Innovative ideas are the hallmark of our successes and move us on. We are passionate about realizing wind energy projects across the globe and meeting tomorrow's energy technology challenges. You and your engagement can make a contribution to shape the future of renewable energies.
