

Service Technician (Mechanical) (m/w/d)

Your Tasks

- You will be in charge of maintenance, maintenance, troubleshooting, and updating of the mechanical drive system of the wind power generation facility in your area. Depending on the work content, joint work with the head office engineer may also occur;
- Basically, a team of two people is formed, and after moving to the site in a service car, work is carried out. You will be asked to perform maintenance inspections while ascending and descending inside and outside the wind turbine. For the time being after joining the company, we expect that you will gain experience in equipment inspection work, and in a few years you will be responsible for not only inspection but also repair work including electrical work.

Your Skills

- Some knowledge about machinery;
- Type 1 driver's license Ordinary car (AT acceptable);
- Those who are not allergic to English.
- Those who want to support Japan's wind power infrastructure are welcome.

DRIVING THE FUTURE

Innovative ideas are the hallmark of our successes and move us on. We are passionate about realizing wind energy projects across the globe and meeting tomorrow's energy technology challenges. You and your engagement can make a contribution to shape the future of renewable energies.
