

Planner/Dispatcher (m/f/d)

You will work in our office in Jabbeke where, together with a team of colleagues, you will take care of the planning of our service teams in Belgium. You are responsible for a region with its service teams. You are good at setting priorities and are not afraid to make decisions. In addition, you can perform well under stress.

Your Tasks

- Based on the maintenance planning, you plan teams so that the turbines receive maintenance at the right time;
- The coordination of the daily business is in your hands. Thanks to you, the teams can do their work efficiently and safely;
- You ensure that the service technicians are scheduled for training at the right time, and you also arrange their leave requests;
- You are the first point of contact for the customer for operational matters, such as maintenance and breakdowns;
- You order materials and arrange courier services so that your colleagues can work properly;
- You work every day from 7 am to 3.30 pm.

What do you get from us?

- A job with an international organisation that makes a solid contribution to the energy transition;
- Your own spot with responsibility to perform the job independently;
- A competitive salary with group insurance, hospitalisation insurance, eco vouchers and meal vouchers;
- A day off now and then? No problem, we offer 20 holiday days and 12 ADV days;
- A challenging job in which no day is the same. For example, the planning depends on the weather conditions and you must respond adequately.

What are we looking for in you?

- A bachelor level of education;
- You have daily contact with various parties such as customers; service technicians and managers. This makes it important that you are a strong communicator and know how to represent everyone's interests;
- You are good at setting priorities. It may happen that several turbines are not working; you decide which turbine gets priority in solving the problem;
- Excellent knowledge of Dutch and French. You also speak English;
- You take the initiative and are therefore aware of what is happening on site;
- Stress resistant and strong in keeping an overview.

DRIVING THE FUTURE

Innovative ideas are the hallmark of our successes and move us on. We are passionate about realizing wind energy projects across the globe and meeting tomorrow's energy technology challenges. You and your engagement can make a contribution to shape the future of renewable energies.
