

## Shipment-planner and Calculator (m/f/d)

### Your Tasks:

- Scheduling of shipments based on project demands;
- Rescheduling/re-planning of transports with respect to the shipping market;
- Create shipping plans for all countries;
- Clarification of the availability of materials;
- Coordination with project team/logistics coordinator regarding delivery strategies and ports;
- Planning of sea transports in the SAP/SCM system, thus transmission of the dates to production;
- Register shipments at the Chartering Department, including preparing the packing list;
- Sending transport numbers to the ports, plants and C&D department;
- Create of individual offshore (shipment) cost calculation;
- Register and verify the calculations in CRM (SAP);
- Central contact person for sales for logistical calculation issues;
- Regular coordination with production planning (S&OP) to update on the production sites and with global procurement to update the shipment costs;
- Verification and double check of prices (e.g. local charges);
- Reduction of "total-landed-costs" with lot plan optimization & early involvement in the selection of production sites;
- Process development on CRM and receiving & analyzing the reports from system;
- Requesting stowage plans and packing lists;
- Follow the market developments and analyze the global indices;
- Coordination with project management e.g. transport strategy.

### Your Skills:

- Master Degree in Supply Chain Management or Logistics/Shipping Management;
- Advanced knowledge in SCM planning, preferred in the logistics;
- Good knowledge in IT Tools & MS Office
- Advanced SAP knowledge;
- Very good language skills in English, spoken and written;
- Preferred experience in project cargo transports (sea), especially windmill;

## DRIVING THE FUTURE

Innovative ideas are the hallmark of our successes and move us on. We are passionate about realizing wind energy projects across the globe and meeting tomorrow's energy technology challenges. You and your engagement can make a contribution to shape the future of renewable energies.
