

Quality Inspector Installation Works

ENERCON. Where everything revolves around your future. Represented in 36 countries, ENERCON is one of the world's leading wind turbine manufacturer. If you want to become a member of our team, now is the time to apply!

The QI IW is responsible for checking the work of the installation teams, from goods receiving of the individual WEC components on the construction site up to the finalization of installation works and handover of the WEC- Wind Energy Converter to ENERCON Service Center. Such quality control is done according to the general ITP- Inspection Test Plan for IW-Installation Works and ends with the coordination of takeover of the IW from the installation team. He is the "eye" on the construction site to be a valuable partner for the SV IW- Supervisor Installation Works and CM- Construction Manager pointing out unusual proceedings, which might lead to delays, quality or safety issues.

Your tasks

Quality management:

- Performing the tasks from our Installation Test Plan
- Ensuring compliance with the specifications from the current assembly instructions
- Monitoring compliance with occupational health and safety regulations
- Recording and processing non-conformities (NCs) in the SAP system and monitoring their completion on site
- Complete quality control documentation
- Checking and filing assembly reports / construction journal / repair reports

Contract management:

- Complete handover procedure to local service departments of WECs and complete WF
- Drafting improvement proposals and corrective measures

DRIVING THE FUTURE

Innovative ideas are the hallmark of our successes and move us on. We are passionate about realizing wind energy projects across the globe and meeting tomorrow's energy technology challenges. You and your engagement can make a contribution to shape the future of renewable energies.
