

## Field Service Technician

**As one of the world's leading companies in the wind energy industry, ENERCON innovations have been setting new standards in technological design for more than 30 years. ENERCON Services Belgium is providing service, maintenance and repair works for its clients in Belgium. Today there are over 370 operational wind turbines in Belgium.**

### Your tasks

- Carry out the maintenance & repairs of wind turbines to assure good functioning of the turbines
- Check the good conditions (both electrical & mechanical) of the turbines; identify issues and/or damages and differentiate the components needed for repairs
- Perform electrical & mechanical repairs
- Write a detailed report on the repairs and what was carried out after the work is completed
- Adhere to and respect all relevant Health & Safety standards and maintenance protocols
- When and where necessary, travel to wind turbine sites throughout Belgium and possibly elsewhere in the Benelux / Europe

### Your profile

- Electromechanical or Electrical degree (Professional Bachelor or A2)
- Ideally experienced in industrial electrics
- Hands-on approach – ability to fault find and report on electrical issues
- Flexibility and high mobility required
- Have a positive, pro-active approach to work in a team environment, along with good organizational and interpersonal skills
- Comfortable with heights (willing to work on towers and platforms up to 130m high)
- Excellent health and fitness levels are essential for this role
- Highly Health & Safety conscious
- Dutch mother tongue, with good knowledge of English & French
- Willingness to travel in Belgium or abroad (training sessions)

You will be climbing the wind turbines on a daily basis. Excellent with heights is a requirement. A proactive, motivated, resourceful team player is needed in this challenging and exiting position. Ability to stick to deadlines and finish work to the highest standards is required.

## DRIVING THE FUTURE

Innovative ideas are the hallmark of our successes and move us on. We are passionate about realizing wind energy projects across the globe and meeting tomorrow's energy technology challenges. You and your engagement can make a contribution to shape the future of renewable energies.
