

Field Service Technician (m/f/d)

As one of the world's leading companies in the wind energy industry, ENERCON innovations have been setting new standards in technological design for more than 30 years. Offering installation, maintenance and servicing of ENERCON wind turbines, ENERCON Services is responsible for the maintenance of 5000 turbines across the Western Europe Region.

Overview:

Reporting to the local Field Area Manager, ENERCON Services Belgium is now recruiting Field Service Technicians to join our team in Jabbeke (Belgium).

Main Roles, Responsibilities and Expectations:

- Service, maintenance and repair of ENERCON wind turbines across the country (from a central based location) according to the coordinator's instruction;
- Responsible for a variety of state of the art electrical, electronic and mechanical equipment;
- Fault finding, problem solving, detecting which parts are needed for repair and report to the technical department;
- Responsible for completing all computerised documentation/reporting;
- Ensuring appropriate stock levels are managed and maintained in the team vehicle;
- Adhering to site rules, policy and procedures to ensure a safe working environment;
- Adhering to Wind Turbine Safety rules and guidelines.

Qualifications and Profile:

- Bachelor Electro-Mechanics (or equivalent by experience);
- Previous experience working on wind turbines is a strong advantage;
- Driving license (B) is essential;
- Good written and verbal communication skills in English and French;
- Flexibility and highly mobility required – willingness to travel across the country to meet the companies requirements;
- Have a positive, pro-active approach to work in a team, along with excellent organizational and interpersonal skills;

DRIVING THE FUTURE

Innovative ideas are the hallmark of our successes and move us on. We are passionate about realizing wind energy projects across the globe and meeting tomorrow's energy technology challenges. You and your engagement can make a contribution to shape the future of renewable energies.
