

## Sales Technical Support Engineer (m/f)

**As one of the world's leading companies in the wind energy industry, ENERCON innovations have been setting new standards in technological design for more than 30 years. ENERCON installed over 380 operational wind turbines in Belgium.**

### Mission

As a member of the sales team, you support the sales department in contractually closing projects by answering project related technical questions. These range from technical and environmental questions to regulatory challenges; such as energy production, acoustics, aviation regulations, environmental impact, evolution of authorization procedures, support mechanisms, etc.

You are in a business critical position where you coordinate technical support for multiple sales projects and (European) tenders, including engaging and coordinating inputs from key technical competencies such as site assessment, ground engineering, grid integration, project management, SCADA-department and finance/treasury management.

### Your tasks

- Support the sales team in technical matters;
- Maintain deep knowledge of wind turbine generators and wind power plant components and features;
- Manage and maintain the documentation necessary for the submission of requests for quotations and tenders;
- Carry out technical, regulatory and competitive monitoring;
- Manage and follow up internal processes and technical requests;
- Identify and analyze market needs and gather statistics;
- Act as an interface between the needs of the BENELUX market and the parent company in Germany;
- Respond to customer requests on technical, environmental and regulatory matters (transmission of documentation and advice);
- Participate in sector organization meetings and be the voice of ENERCON in these meetings with authorities and/or administrations;
- Occasionally support the sales managers at customers meetings to present your technical support and expertise.

### Your profile

- You hold a Master's degree in Engineering;
- You have a passion for new technologies & renewable energy;
- You are fluent in Dutch, English & French as working languages, German is an asset;
- You have strong communicational, administrative and organizational skills;
- You are problem solving-oriented and have an ability to think strategically;
- You are able to work across multiple projects simultaneously while maintaining attention to detail;
- You are result-oriented, a team player who can work independently and you have a high level of achievement.

### We offer

- A permanent full-time job in a dynamic work environment;
- Many responsibilities and the possibility to take ownership of your work;
- An attractive salary & benefits package (such as hospitalization & group insurance).

## DRIVING THE FUTURE

Innovative ideas are the hallmark of our successes and move us on. We are passionate about realizing wind energy projects across the globe and meeting tomorrow's energy technology challenges. You and your engagement can make a contribution to shape the future of renewable energies.
